Professional Summary

Computer Science undergraduate with experience developing enterprise workflow automation, AI-powered applications, and full-stack web solutions. Built ServiceNow-based HR automation workflows and intelligent software using React.js, Node.js, Python, and MongoDB. Passionate about engineering scalable enterprise applications and solving business problems through automation.

Education

B.E. Computer Science & Engineering , Alva's Institute of Engineering & Technology	CGPA: 8.0	2023–2027
Pre-University , Vidhyanidhi PU College	77%	2023
Secondary Education , Nalanda High School	88%	2021

Professional Experience

Full Stack Developer Intern <i>Metasoft IT Solutions</i>	Aug 2026 – Present <i>Offline</i>
--	---

- Developing full-stack web applications using the **MERN stack** including React.js, Node.js, Express.js, and MongoDB.

ServiceNow Virtual Internship <i>ServiceNow University × SmartBridge × AICTE</i>	Apr 2026
--	-----------------

- Completed an AICTE-sponsored ServiceNow Virtual Internship through ServiceNow University and SmartBridge.
- Strengthened knowledge of enterprise workflow automation and IT Service Management (ITSM) concepts.

ServiceNow Developer Intern <i>Amzeno Innovations</i>	Jun 2026 – Jul 30, 2026 <i>Online</i>
---	---

- Developed an **Enterprise Employee Onboarding Request** application for HR process automation using ServiceNow.
- Designed and implemented multi-level approval workflows involving HR, Managers, IT, and Administration using Flow Designer.

Selected Projects

TargetX – AI-Based CRISPR gRNA Prediction — GitHub	Python — Flask — React
---	------------------------

- Developed an AI-powered bioinformatics platform that predicts CRISPR guide RNAs using PAM site detection, candidate ranking and off-target analysis.
- Integrated machine learning models with biological sequence and genomic data to evaluate gRNA efficiency and provide explainable, ranked recommendations, enabling researchers to make data-driven CRISPR targeting decisions.

Faculty Appraisal Management System — GitHub	React — Node — MongoDB
---	------------------------

- Designed and developed a role-based Faculty Appraisal Management System featuring automated score calculation, document generation and multi-level approval workflows.
- Engineered a full-stack workflow enabling secure faculty submissions, HOD review, and Principal approval with department-wise dashboards, notifications.

Vatsalya – AI Healthcare Platform — GitHub	React — Node
---	--------------

- Designed an AI-enabled healthcare platform for elderly care featuring medication reminders, emergency SOS functionality and health monitoring.

Technical Skills

Languages	C, Python, JavaScript, SQL
Frontend	React.js, HTML5, CSS
Backend	Node.js, Express.js
Databases	MongoDB, MongoDB Atlas, MySQL
Enterprise	ServiceNow, Flow Designer, Catalog Items, Record Producers, Business Rules, Client Scripts, UI Policies
Tools	Git, GitHub, VS Code, Postman, Overleaf

Leadership & Publications

- Organiser and Sponsorship Lead** – Xypheria National Level 24-Hour Hackathon.
- IEEE conference review paper accepted for publication on **Mobile Extended Reality (MXR)**.
- Shortlisted among the Top 30 teams out of 100+ teams at the **Ud gama National Level Hackathon 2025**.
